

# MTSS Implementation: How To Identify Your Priorities With an "Impact-Effort Map"

BRANCHING  
MINDS

How do you get the most impact out of your MTSS efforts? Impact and effort are often competing realities, so it can be a challenge to know how to strategically approach the work. **An Impact-Effort Map is a tool you can use to visualize and prioritize tasks when launching your MTSS practice or with any initiative.** It's a two-dimensional matrix where impact is plotted against effort in order to identify which tasks should be done now, done later, or delegated.

## How to Create and Use an Impact-Effort Map:

### ❑ Define Criteria:

Clearly define what impact and effort mean in your context. Impact could be the potential positive effect on your goals, and effort could be the resources, time, or complexity involved.

### ❑ Identify Tasks/Projects:

List all the tasks or projects that need prioritization associated with the initiative that you plan to implement. Ensure that the list is comprehensive.

### ❑ Rate Impact and Effort:

Assess and rate each task or project based on its potential impact and effort required.

### ❑ Create the Matrix and Plot Tasks/Projects:

Draw a 2x2 matrix where one axis represents impact, and the other represents effort. This creates four quadrants.

#### HIGH IMPACT, LOW EFFORT (QUICK WINS)

**“Do Now”** - these tasks need to be prioritized and addressed as soon as possible.

#### HIGH IMPACT, HIGH EFFORT (MAJOR PROJECTS)

**“Schedule”** are high-priority tasks that will take longer to accomplish and should be scheduled with timelines and deadlines.

#### LOW IMPACT, LOW EFFORT (LOW PRIORITY)

**“Do Later”** tasks can be done when there is capacity, much like those chores we save for a rainy day.

#### LOW IMPACT, HIGH EFFORT (DELEGATE OR REMOVE)

These tasks should be considered for removal from the list or delegated.

### ❑ **Adjust and Refine:**

Assess whether any adjustments are needed based on additional information, changing priorities, or new developments.

### ❑ **Communicate:**

Communicate the prioritized list to relevant stakeholders. Ensure everyone understands the rationale behind the prioritization.

Regularly review and update the Impact-Effort Map as circumstances change. This helps in keeping priorities aligned with current needs and goals.

**Using an Impact-Effort Map helps you visualize the work and prioritize the most impactful and feasible projects.**

## TIPS

- » Educational leaders are usually juggling the implementation of several initiatives. This tool is best when **focusing on one initiative**, and all of the items needing to be accomplished in order to implement that change.
- » This tool can serve both an individual or a team that is driving MTSS implementation.

Branching Minds engages educators in professional development that:

- » **Deepens** understanding and practice
- » **Strengthens** the infrastructure needed for a sustainable Multi-Tiered System of Supports (MTSS).
